EXPERIENCE

Software Developer

Toronto, ON

University of Toronto, Students Developing Software Team

May 2022 – September 2022

- Assisted in developing MarkUs - a Rails application used for submission and grading by 3 academic institutions.
- Redesigned file submission by providing students with a checklist and an option to rename their files.
- Created multiple UI/UX elements such as drag and drop, emoji annotations and improved 400 error pages.
- Improved assessment reports for an easier transfer of grades to other platforms such as Quercus and Crowdmark.

Computer Science Intern

Toronto, ON

University of Toronto, Sidney Smith Commons

May 2022 – September 2022

- Provided peer support and academic guidance to current and incoming Computer Science students.
- Handled correspondence via email with over 500 newly admitted Computer Science students.
- Developed Instagram content for over 4000 followers to improve student engagement and outreach.

Instructor

Remote

Mathstronauts

October 2021 – May 2022

- Taught web and game development to high school students in an online setting.
- Maintained version control for students' projects, template code files and lecture notes using GitHub.
- Prepared slideshows, Kahoot quizzes and assignments to improve student learning.

PERSONAL PROJECTS

Expense Tracker | *MongoDB, Node.js, React*

Website **GitHub**

- Developed a full-stack web application to help users keep track of their expenses.
- Implemented Google OAuth for authentication.

Weather Forecaster | *Node.js, React, REST APIs*

Website **GitHub**

- Developed a full-stack web application that shows the weather forecast for a searched location.
- Uses REST APIs of Mapbox and OpenWeather to receive the weather forecast data in JSON.

Stock Prices vs Economic Indicators | *Python, PySimpleGUI, Matplotlib, Numpy, Pandas*

GitHub

- Developed a python application that analyzes the correlation between stock prices and economic indicators such as Unemployment Rate and Unemployed per Job Openings during Covid-19.

The Seasons Collection: Spring | *Unreal Engine 4, C++*

Steam

- Developed a 3D First Person Shooter game.
- Published on Steam with over 15000 unique units activated.
- Integrated Discord Rich Presence using Discord's API and SDK.
